### **Vehicle Condition**

First off this is a running (on starting fluid) project. Please see the video in the dropbox link of it running. A new fuel pump will be needed to get here fully running.

The shell overall is in pretty good and straight shape, there is some fiberglass on the drivers rocker panel. It will need new paint eventually, the clear coat is peeling on some of the car. There is rust in the small frame rails underneath and where it attached to the main frame rail, please see photos in Dropbox. I have the bumpers, grille and surround for the front, also a few small boxes of misc parts as well. The starter works to turn the engine over and the compression is 132-145psi in all 4 cylinders.

The glass is in great shape along with the drivers seat and passenger, the rear seat is in pretty good shape as well. The headliner doesn't have any holes and sagging areas. The interior could use a good cleaning but overall it's a good project for someone.

The engine bay doesn't appear to be missing anything but I didn't test anything further after the compression test and engine starting off of starter fluid. Brakes have not been checked.

Overall this will be a great project for someone, once it's running one could drive it as they work on it.

This ES comes with 2 Sets of Keys, a clean and clear WA State Title and a small folder of paperwork.

Thanks so much and happy bidding.

Ps. \$1,000 Deposit is required 24 hours after the close of the auction, I'll move onto the next person if a deposit doesn't come through, sorry if that sounds mean. The remaining balance is due within 5 business days.

I can help get a quote for transportation and I can hold the Volvo for a while to arrange transport as well, I have a nice warm shop I'll keep it in. This is a used Volvo with no warranty implied. If you need it inspected before the auction ends please reach out!

Please only bid if you have the funds and permission to bid! :)
